2. Background: [REDACTED] is a Program Monitor for the General Defense Intelligence Program (GDIP). The proposed travel will permit him to visit GDIP units and activities in the Pacific, and will permit him to become familiar with the operations, missions, requirements, and requested funding for these units and activities. [REDACTED] has never visited GDIP Pacific units or activities. Travel of this kind is essential for a Program Monitor to establish and maintain the expertise needed to perform his duties. The itinerary includes visits to the most important GDIP activities in the Theater and to working Defense Attache Offices in countries in which the US has no or minimal military force levels. This should be of significant benefit to [REDACTED] and the Program and Budget Staff. (U)
